Pride Performance Value

We provide an end-to-end capability for electrical installation services for commercial construction projects.

Our capability allows us to add value through the entire project life cycle from initial concept through to design, construction and installation, maintenance and ongoing facilities management.

Commercial

Every building project is unique, but they all demand the same level of professional care in order to meet the end users' expectations. Working in a collaborative relationship with our customers, we apply our extensive experience to a wide range of projects including; banks, offices, food processing plants, correctional facilities, hospitals, apartments, high-rise structures, and local government facilities.

Value Adding Services

Providing added value for our customers is a key objective with every project we undertake. To provide maximum benefit to our customers, Electrix seeks the opportunity to become involved in projects during the concept and design development phases.

Early involvement enables us to add value by positively influencing design outcomes to reduce project costs and delivery time through; value engineering, innovative solutions and constructability analysis.

We achieve this by applying the expertise of the Electrix team to areas such as:

- Design and specification critique
- Optimum materials selection and procurement
- Standardisation in selection and sizing of equipment
- Off-site prefabrication
- Planning of the installation process
- Quality and commissioning systems
- Constructability analysis
- Programming and scheduling refinements
- Commissioning process systems

We provide optimum outcomes for our customers by working with them and our technology partners to address these issues early in the project cycle.

National Coverage & Capability

Electrix has extensive coverage across Australia and New Zealand. This provides our customers with local access to an experienced management team and workforce that are highly skilled in completing specialised work in challenging environments and within tight time frames. Our proven capabilities are recognised in the commercial sector where our ability to offer innovative solutions has enabled us to consistently add value and achieve project efficiencies on behalf of our customers.

Our experience is broad and covers a range of working environments from busy city centres and commercial precincts to remote rural locations.

Electrix customers also benefit from our capability to provide ongoing preventative, scheduled and on-call break down maintenance services. Our experience in this area ensures outages for planned upgrades and major maintenance are managed effectively to minimise disruption.

Safety

Safety is paramount across all our operations and safety awareness is embedded in our culture. Electrix is committed to providing a safe work environment for all employees and stakeholders and our highly developed, fully accredited safety management systems are integral to all our business activities.

Management Systems

A key success factor for large commercial projects is the application of effective project management skills and systems. Electrix is highly skilled in implementing project management systems to accommodate our customers' requirements, and provide quality documentation to support our customers in management of their projects and regulatory requirements.

People & Skills Development

Electrix recognises our main asset is our people and invests heavily in the development and retention of employees. Electrix is considered an employer of choice and employees receive both in-house and external training and development programmes to continually improve their skills.

The development of our employees allows us to provide career progression opportunities and promotion from within the organisation. This results in a skilled, high performing, cohesive and loyal team culture, providing a stable workforce and industrial relations environment.

Design, construction, maintenance and management

Services

- Design, construction, maintenance and management
- Programmed building maintenance and facilities management
- Greenfield commercial facilities
- Electrical reticulation systems
- Transport systems, including tunnels, rail systems and transport hubs
- HV and MV substations and switchboards
- Switchgear services
- Electrical services
- ICT installation services
- Refurbishments and upgrades
- UPS, static inverter and central battery systems
- Standby generator installations
- PLC and SCADA control, monitoring and automation systems
- Evaluation of energy management and associated services
- HVAC service and installation
- Supply and installation of traffic control equipment including traffic lights, school speed signs, and variable message signs
- Supply installation and maintenance of automated carparking equipment, together with traffic barriers and automated swing and sliding gate controls
- 24 hour emergency call out services

Electrix

We are a leading provider of electrical engineering, construction and maintenance services to asset owners in the commercial, infrastructure, utility, industrial and resources sectors.

Our capability means that we are a true end-to-end service partner.

With experience and understanding comes the ability to adapt and innovate and consistently create opportunities to improve efficiency and deliver better outcomes.

The ability to operate in remote locations and across wide geographical areas means we understand and meet the logistical and practical challenges involved with major projects and work programmes.

To each and every engagement we bring our experience and technical expertise along with a commitment to safety, quality, innovation and the environment.
